ChosenSecurity to Resell GeoTrust SSL Certificates

NEEDHAM, Mass. – July 24, 2007 – ChosenSecurity, Inc., a leading specialist in identity verification and security services, today announced a reseller agreement with GeoTrust, Inc. Under the terms of the agreement, ChosenSecurity will offer new customers five of GeoTrust's products: QuickSSL® Premium, True BusinessID®, True BusinessID Wildcard, True BusinessID with Extended Validation (EV) and Code Signing Certificates. The agreement broadens ChosenSecurity's line of identity verification solutions and allows new customers to do business with an organization led by the original GeoTrust management team.

ChosenSecurity was spun out of GeoTrust following that company's 2006 acquisition by VeriSign. Today's agreement allows the ChosenSecurity team to resell some of the most widely used GeoTrust products and to round out ChosenSecurity's family of digital identity offerings, which secure network communications; encrypt transactions and data; secure access to applications; and authenticate individuals, documents, businesses and data.

"Thousands of companies worldwide know the ChosenSecurity team, and now they can buy several GeoTrust-branded products directly from us," said Dean Coclin, Vice President of Business Development at ChosenSecurity. "GeoTrust made it easy to purchase digital certificates and we've brought the same philosophy to ChosenSecurity. We're pleased to be back in the fast-growing market for SSL products."

Michael Lin, Director of Product Management, GeoTrust said: "ChosenSecurity is a natural partner for GeoTrust. They have deep knowledge and experience with our products and services, and we are pleased that they will be delivering the high level of products and services associated with GeoTrust to their customer base."

ChosenSecurity will offer the following SSL products:

- **QuickSSL Premium**—Enables up to 256-bit SSL encryption and includes a GeoTrust dynamic site seal that identifies a site as authentic and validated by a third party.
- **True BusinessID**—A fully authenticated SSL certificate that allows browser and server recognition, as well as access protection and fraud prevention, of a company's web site.
- **True BusinessID Wildcard**—Allows businesses to cost-effectively secure multiple fully qualified domains if they share the same base domain name and reside on the same physical server.
- **True BusinessID with EV**—Designed for ecommerce sites, this product helps protect consumers from phishing scams by assuring customers of the site's identity by displaying a green address bar and the organization's and GeoTrust's names in high-security browsers.
- **Code Signing Certificates**—Allows content publishers and software developers to digitally sign software objects, macros, device drivers, firmware images, virus updates, and configuration files for secure delivery over the Internet.

About ChosenSecurity, Inc.

ChosenSecurity, Inc. is a leading specialist in identity verification and security services that ensure safe and secure online communication and transactions. Since 1997, the company, previously a subsidiary of GeoTrust, has offered certificates and security solutions along the entire value chain of identity verification.
