

TC ID Store

On-Demand Digital Identity

Shortcut to Certificates – Security On-Demand

Gain full access to multiple and different retail certificates for your environment using TC ID Store. Superior service quality, simplicity, interoperability and zero footprint-administration – all at an affordable price.

We provide the infrastructure you can trust.

In the past the organizations could decide to buy multiple and different certificates for web operations and employee's mail one-by-one or to consider the implementation of an in-house PKI or the use of a managed service. For a couple of hundred certificates these approaches may not be efficient. The first one does not allow administrating the certificates reasonably including a lot of effort in applying for the single certificates. The second one may be oversized.

ChosenSecurity offers a new low-price managed service alternative: TC ID Store. With TC ID Store, it is easy to apply for all types of retail certificates using our web portal:

- Choose from various standard certificates
- Provide partners with certificates
- Review your certificates at any time
- Minimize registration efforts
- Save time and costs
- Your choice of discount

Our unique platform enables organizations to utilize certificates without the need for additional dedicated hardware, software, personnel and their related costs. In less than a day you can gain access to your personal TC ID Store which provides as many and various certificates you require.

➔ Easy to Use and Easy to Administer

The screenshot displays the 'TC ID Store Demo' web interface. The top navigation bar includes 'Home', 'Certificates', 'Users', 'Search Users', 'Add User', 'Batch', 'Configuration', and 'Reports'. The main content area is titled 'Search Users' and features a search form with fields for Username, First Name, Email, Department, Last Name (containing '*Doe*'), and User Principal Name. Below the search form is a 'Manage Users' section containing a table of user records.

	<input type="checkbox"/>	Username	First Name	Last Name	Email	Department	User Principal Name	Action
	<input type="checkbox"/>	Jane.Doe@trustcenter.de	Jane	Doe	Jane.Doe@trustc...			
	<input type="checkbox"/>	john.doe@trustcenter.de	John	Doe	john.doe@trustc...	TestLab

Define the Price

With the new deposit-based pricing, you define the price: you can choose an amount you want to deposit into your TC ID Store account and select the types of certificates to apply for. These certificates are then available at a rate determined by the deposit amount.

Zero Foot-Print Administration

TC ID Store is a web-based portal. A browser is all you need whether you are a client or an administrator. Via the Web, the user can: request, approve, revoke certificates, as well as suspend or unsuspend certificates. At any time you have access to comprehensive activity reports.

Activity Reports

Global Root – Door Opener for Secure Electronic Communication Among your Organization

Your certificates will be issued from the TC TrustCenter's publicly trusted root certificates. The TC TrustCenter root certificates are preinstalled in e-mail clients, web browsers and other operating systems and applications. This permits simple authentication of individuals, as well as easy verification of digitally signed and encrypted data. So you can use standard applications to securely communicate whether you use them internally or externally.

Features and Benefits:

- > Easy and immediate access via web portal
- > International X.509 standard and ISIS-MTT compatible certificate profiles
- > Various certificate types (Personal, Team, Gateway, Domain Controller) available. Certificate validity 1, 2 or 3 years
- > Instant certificate issuance (one time organization registration)
- > Partner certificates without additional organization vetting
- > Access to comprehensive activity reports

TC ID Store is compatible with:

Microsoft Windows and other certificate-capable applications like Microsoft Internet Explorer, Microsoft Word, Firefox, Mozilla, Thunderbird, Seamonkey, Netscape, Opera and Open Office.

Free 60-day trial available without any obligation. Test it now!
